Fleet Assurance

A 360° view of your fleet.

At LiftOne, we understand that having detailed insights into your fleet is essential for maintaining high productivity and operational efficiency. Fleet Assurance enables a forward-thinking partnership through the transparent delivery of work order data, asset utilization and related invoices with your material handling supplier.

Using business intelligence dashboarding, we transform your fleet details into visualized insights, providing data-backed recommendations that may enhance productivity and help reduce the total cost of ownership.

This comprehensive report paired with a consultative review with your LiftOne team, empowers you to make proactive decisions, addressing your day-to-day business challenges and helping you meet your goals and KPIs.

With Fleet Assurance, you'll get a better understanding of:

- Asset hour meter readings
- Asset's cost per hour
- Month-over-month spend analysis
- Maintenance and repair trends
- Scheduled vs unscheduled downtime
- Fleet utilization levels
- And more

INSIGHTS360

Dynamic visual analytics reports that reveal trends within your fleet, delivering valuable insights into your assets' utilization and maintenance history. Gain a comprehensive understanding of your scheduled and unscheduled repair downtime, a detailed breakdown of your total expenses, repairs, a break-even analysis and more.

CONSULTATIVE SOLUTIONS

As part of our partnership, our Fleet Assurance team will provide you a thorough summary of your Insights360 reports and collaborate with you to make proactive decisions aimed at addressing your business challenges. This encompasses solutions for optimizing your fleet size, enhancing fleet rotation and streamlining your aftermarket requirements, enabling you to make more informed budget decisions.
